EXPERIENCE

PayU |

July 2025 – Present

Software Engineer Intern

Bengaluru

- **Technologies:** Java, Spring Boot, Redis, SQL, Microservices
- Developed backend services in the **Offer Engine** team, enabling merchant offer creation and real-time application during transactions for **CRED, Dell, HP, Wakefit and Dyson**.
- Owned the design and implementation of **Redis-based caching** for offer APIs using TTL-based eviction, reducing API latency by 70%.
- Developed **Bulk offer API** processing **100 offers** per file, reducing manual creation time by **90% (2-3 hours to 10-15 minutes)**.
- Fixed production issues and optimized SQL queries, improving backend throughput and system reliability.
- Wrote JUnit tests achieving 90%+ coverage, ensuring production reliability.

GeeksforGeeks |

March 2025 - June 2025

Software Engineer Intern

Noida

- **Technologies:** Python, Django, SQL
- Migrated performance-critical database logic into scalable REST APIs, reducing database load and cutting **infrastructure costs**, while improving maintainability across multiple services.
- Built a **Recommended for You Article recommendation system** that personalized content for users and increased article discovery and repeat engagement by **20%**.

Thales |

July 2024 - August 2024

Software Engineer Intern

Noida

- * **Technologies:** Java, REST APIs
- * Implemented and validated hashing mechanisms using OpenSSL as part of legacy system analysis, ensuring 100% checksum integrity across test datasets.

ACHIEVEMENTS

- **ACM-ICPC Asia-West Amritapuri Regionals'23** Secured Regional rank **157** and earned College **Rank 1** in Preliminary Round.
- Attained **Rank 62** in CodeRush October 2023 out of **17,000** participants
- Acquired **Rank 2** in Codeshell, a competitive coding contest organized at the college level with **500+** participants.
- Solved **600+** **DSA** problems on LeetCode, Codeforces and CodeChef.
- **Codeforces (Specialist):** codeforces.com/profile/Shreyansh_2003
- **LeetCode (Top 3%):** leetcode.com/shreyansh_2003

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, Javascript

FrontEnd Technologies: Html, CSS, ReactJs, Typescript

Backend Systems: Spring Boot, Microservices, REST APIs, Redis, SQL, Spring AI, Django, System Design, Scalable Backend, SonarQube, JUnits, Systems Design, API Design, Caching Strategies, Distributed Systems Caching Strategies

Databases Caching: MySQL, PostgreSQL, Redis

AI Tools: Chatgpt, Cursor AI, Copilot

Relevant Coursework : DSA, OOP, Operating Systems, DBMS, Computer Networks

PROJECTS

SeatLock

- **Technologies:** Java, Spring Boot, MySQL
- Built a real-time seat booking engine using **Redis distributed locks** to handle concurrent reservations across multiple instances, preventing double-booking with **optimistic + pessimistic** locking strategies.
- Reduced database load by **70%** using **multi-tier Redis** caching with **TTL-based invalidation**, and added Prometheus metrics for production monitoring.

Certifications

Java Spring Boot (Udemy)

—

Problem Solving (HackerRank)

—

EDUCATION

Ajay Kumar Garg Engineering College

October 2021 - July 2025

Bachelor of Technology (B.Tech) (IT)
